

Chemical-structure taxonomy (ChemOnt) — how many layers

what each molecule is · 4,825 classes across 12 levels (root = level 0)

Example of one full path (root → leaf):

Chemical entities → Organic compounds → Benzenoids → Benzene and substituted derivatives → Benzoic acids and derivatives → Hydroxybenzoic acid derivatives → Salicylic acid and derivatives → Aminosalicylic acids and derivatives → 3-aminosalicylic acids and derivatives → 3-aminosalicylic acids
