

ChemOnt superclass: **Acetylides**

Chemical entities → Organic/Inorganic compounds → this superclass

1 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● **Acetylides**

● **Metal acetylides**

ChemOnt superclass: Alkaloids and derivatives

Chemical entities → Organic/Inorganic compounds → this superclass
146 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Alkaloids and derivatives

- 1-azafluoranthenes
- 1-azaoxoaporphines
- 10,11-secoergolines
- 4,5-epoxy-10-normorphinans
- 4a-homomorphinans
- 6,6a-secoaporphines
- 6,7-benzomorphans (+2 deeper)
- 6,7-secoergolines
- 9b-azaphenalenenes
- Acutumine and related alkaloids
- Ajmaline-sarpagine alkaloids
- Akageran and related alkaloids
- Akuammilan and related alkaloids
- Allocolchicine alkaloids
- Amaryllidaceae alkaloids (+11 deeper)
- Anatoxins
- Androcymbine alkaloids
- Aporphines (+3 deeper)
- Aristolactams
- Aspidofractine alkaloids
- Aspidospermatan-type alkaloids
- Azahomoaporphines
- Benzophenanthridine alkaloids (+5 deeper)
- Betalains (+2 deeper)
- Camptothecins
- Cephalotaxus alkaloids
- Cinchona alkaloids
- Colchicines
- Condylocarpan alkaloids
- Correantan alkaloids
- Corynanthean-type alkaloids
- Cularin alkaloids and derivatives
- Curan alkaloids
- Cytochalasans (+5 deeper)
- Daphniphylline-type alkaloids
- Eburnan-type alkaloids
- Ellipticine alkaloids
- Emetine alkaloids
- Epibatidine analogues
- Ergoline and derivatives (+7 deeper)
- Ervatamia alkaloids
- Erythrina alkaloids (+2 deeper)
- Gelsemium alkaloids
- Harmala alkaloids
- Hasubanan alkaloids
- Histrionicotoxins
- Homoaporphines
- Homoproaporphines
- Ibogan-type alkaloids
- Indolonaphthyridine alkaloids
- Isoaporphines (+1 deeper)
- Isopavine alkaloids
- Isporenylated bicyclo [2.2.2] alkaloids
- Kopsane alkaloids
- Loline alkaloids and derivatives
- Lumicolchicine alkaloids
- Lupin alkaloids (+8 deeper)
- Macroline alkaloids
- Melodinus alkaloids
- Morphinans
- Oxaergolines
- Oxamorphinans
- Pandoline alkaloids
- Pavine alkaloids
- Phenethylisoquinoline alkaloids
- Phthalide isoquinolines
- Pleiocarpaman alkaloids
- Plumeran-type alkaloids
- Proaporphines
- Protoberberine alkaloids and derivatives
- Protopine alkaloids
- Pumiliotoxins, homopumiliotoxins, and allopumiliotoxins
- Quebrachamine alkaloids
- Rhazinilam alkaloids
- Rhoeadine alkaloids
- Schizogygine alkaloids
- Stemona alkaloids (+9 deeper)
- Strictosidine alkaloids
- Strychnos alkaloids
- Tacaman alkaloids
- Thiaergolines
- Tropane alkaloids (+1 deeper)
- Tropoloisoquinolines
- Vallesaman alkaloids
- Vallesiachotaman alkaloids
- Vinca alkaloids
- Vincosan alkaloids
- Vobasan alkaloids
- Yohimbine alkaloids
- Yuzurimine-type alkaloids

ChemOnt superclass: Allenes

Chemical entities → Organic/Inorganic compounds → this superclass

2 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

- **Allenes**

- **Acyclic allenes**

- **Cyclic allenes**

ChemOnt superclass: Benzenoids

Chemical entities → Organic/Inorganic compounds → this superclass

411 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Benzenoids

- 1-hydroxylamino, 2-unsubstituted benzenoids
- 1-hydroxylamino, 4-unsubstituted benzenoids
- Acenaphthylenes
- Anthracenes (+6 deeper)
- Benzene and substituted derivatives (+267 deeper)
- Dibenzocycloheptenes
- Ellagic acids and derivatives
- Fluorenes
- Indanes (+3 deeper)
- Indenes and isoindenes (+1 deeper)
- N-phenylhydroxylamines (+1 deeper)
- Naphthacenes (+1 deeper)
- Naphthalenes (+27 deeper)
- O-phenylhydroxylamines (+1 deeper)
- Pentacenequinones
- Pentacenes
- Perylenequinones (+1 deeper)
- Phenalanes
- Phenalenes (+1 deeper)
- Phenanthrenes and derivatives (+8 deeper)
- Phenol esters
- Phenol ethers (+2 deeper)
- Phenols (+61 deeper)
- Pyrenes (+1 deeper)
- Tetralins (+1 deeper)
- Thiophenol esters
- Thiophenol ethers
- Thiophenols
- Triphenyl compounds

ChemOnt superclass: Carbenes

Chemical entities → Organic/Inorganic compounds → this superclass

0 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Carbenes

ChemOnt superclass: Homogeneous metal compounds

Chemical entities → Organic/Inorganic compounds → this superclass

14 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Homogeneous metal compounds

- Homogeneous actinide compounds
- Homogeneous alkali metal compounds
- Homogeneous alkaline earth metal compounds
- Homogeneous lanthanide compounds
- Homogeneous metalloid compounds
- Homogeneous post-transition metal compounds
- Homogeneous transition metal compounds
- Intermetallic actinide compounds
- Intermetallic alkali metal compounds
- Intermetallic alkaline earth metal compounds
- Intermetallic lanthanide compounds
- Intermetallic metalloid compounds
- Intermetallic post-transition metal compounds
- Intermetallic transition metal compounds

ChemOnt superclass: Homogeneous non-metal compounds

Chemical entities → Organic/Inorganic compounds → this superclass

52 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Homogeneous non-metal compounds

- Halogen organides (+4 deeper)
- Homogeneous halogens
- Homogeneous noble gases
- Homogeneous other non-metal compounds
- Non-metal oxoanionic compounds (+37 deeper)
- Other non-metal halides
- Other non-metal organides (+4 deeper)

ChemOnt superclass: Hydrocarbon derivatives

Chemical entities → Organic/Inorganic compounds → this superclass

7 sub-classes below in total · shown to depth 3 (branches marked '(+N deeper)' continue further)

● Hydrocarbon derivatives

● Quinodimethanes

- M-quinodimethanes
- O-quinodimethanes
- P-quinodimethanes

● Tropones

- Tropolones
 - Benzotropolones

ChemOnt superclass: Hydrocarbons

Chemical entities → Organic/Inorganic compounds → this superclass

33 sub-classes below in total · shown to depth 5 (branches marked '(+N deeper)' continue further)

● Hydrocarbons

ChemOnt superclass: Inorganic salts

Chemical entities → Organic/Inorganic compounds → this superclass

12 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Inorganic salts

- Inorganic antimony salts
- Inorganic beryllium salts
- Inorganic cadmium salts
- Inorganic calcium salts
- Inorganic chloride salts
- Inorganic cobalt salts
- Inorganic copper salts
- Inorganic lead salts
- Inorganic lithium salts
- Inorganic silver salts
- Inorganic sodium salts
- Inorganic tin salts

ChemOnt superclass: Lignans, neolignans and related compounds

Chemical entities → Organic/Inorganic compounds → this superclass

25 sub-classes below in total · shown to depth 4 (branches marked '(+N deeper)' continue further)

● Lignans, neolignans and related compounds

ChemOnt superclass: Lipids and lipid-like molecules

Chemical entities → Organic/Inorganic compounds → this superclass

678 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Lipids and lipid-like molecules

- Alkyl-CoA disulfides
- Endocannabinoids
- Fatty Acyls (+127 deeper)
- Glycerol-3-dithiophosphocholines
- Glycerol-3-thiophosphocholines
- Glycerolipids (+49 deeper)
- Glycerophospholipids (+122 deeper)
- Glycerophosphonolipids (+7 deeper)
- Prenol lipids (+182 deeper)
- S-alkyl-CoAs
- Saccharolipids (+1 deeper)
- Sphingolipids (+35 deeper)
- Steroids and steroid derivatives (+142 deeper)

ChemOnt superclass: Miscellaneous inorganic compounds

Chemical entities → Organic/Inorganic compounds → this superclass

39 sub-classes below in total · shown to depth 2 (branches marked '(+N deeper)' continue further)

● Miscellaneous inorganic compounds

● Carbides

- Salt-like carbides

● Inorganic 1,3-dipolar compounds

- Allyl-type 1,3-dipolar inorganic compounds
- Propargyl-type 1,3-dipolar inorganic compounds

● Inorganic 3-nitrosotriazenes

● Inorganic anions

● Inorganic arsenic compounds

- Inorganic arsenides
- Pentavalent inorganic arsenic compounds
- Trivalent inorganic arsenic compounds

● Inorganic azides

● Inorganic cations

● Inorganic chromium (VI) compounds

● Inorganic chromium trioxides

● Inorganic cyanides

● Inorganic hydrides

● Inorganic hydroxylamines

● Inorganic isocyanides

● Inorganic mercury compounds

● Inorganic nickel compounds

● Inorganic nitrides

● Inorganic nitrites

● Inorganic nitrosamines

● Inorganic oxides

● Inorganic phosphides

● Inorganic phosphorotrithioic acids and derivatives

● Inorganic pnictogen compounds

● Inorganic selenides

● Inorganic silicides

● Inorganic sulfides

● Inorganic sulfuryl halides

- Inorganic sulfuryl bromides
- Inorganic sulfuryl chlorides
- Inorganic sulfuryl fluorides
- Inorganic sulfuryl iodides

● Inorganic thalium compounds

● Inorganic thionylimides

● Inorganic zwitterions

ChemOnt superclass: Mixed metal/non-metal compounds

Chemical entities → Organic/Inorganic compounds → this superclass

555 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Mixed metal/non-metal compounds

- Actinide organides (+4 deeper)
- Actinide oxoanionic compounds (+63 deeper)
- Actinide salts (+5 deeper)
- Alkali metal organides (+4 deeper)
- Alkali metal oxoanionic compounds (+63 deeper)
- Alkali metal salts (+5 deeper)
- Alkaline earth metal organides (+4 deeper)
- Alkaline earth metal oxoanionic compounds (+62 deeper)
- Alkaline earth metal salts (+5 deeper)
- Lanthanide organides (+4 deeper)
- Lanthanide oxoanionic compounds (+62 deeper)
- Lanthanide salts (+5 deeper)
- Metalloid organides (+4 deeper)
- Metalloid oxoanionic compounds (+62 deeper)
- Metalloid salts (+5 deeper)
- Miscellaneous mixed metal/non-metals (+23 deeper)
- Other mixed metal/non-metal oxoanionic compounds (+8 deeper)
- Post-transition metal organides (+4 deeper)
- Post-transition metal oxoanionic compounds (+63 deeper)
- Post-transition metal salts (+5 deeper)
- Transition metal organides (+4 deeper)
- Transition metal oxoanionic compounds (+63 deeper)
- Transition metal salts (+5 deeper)

ChemOnt superclass: Nucleosides, nucleotides, and analogues

Chemical entities → Organic/Inorganic compounds → this superclass

189 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Nucleosides, nucleotides, and analogues

- (2'->5')-dinucleotides (+1 deeper)
- (3'->5')-dinucleotides and analogues (+9 deeper)
- (5'->5')-dinucleotides
- 1,3,5-triazine ribonucleosides and ribonucleotides
- 2',3'-dideoxy-3'-thionucleoside diphosphates
- 2',3'-dideoxy-3'-thionucleoside monophosphates
- 2',3'-dideoxy-3'-thionucleoside triphosphates
- 2',3'-dideoxy-3'-thionucleosides
- 2',5'-dideoxyribonucleosides
- 5'-O-tritylated nucleosides and derivatives
- 5'-deoxyribonucleosides (+3 deeper)
- Benzimidazole ribonucleosides and ribonucleotides
- Benzotriazole ribonucleosides and ribonucleotides
- Deoxyribo- and ribonucleoside phosphonates (+2 deeper)
- Flavin nucleotides
- Furo[3,2-d]pyrimidine glycosides
- Furo[3,4-d]pyrimidine glycosides
- Glycinamide ribonucleotides
- Imidazole ribonucleosides and ribonucleotides (+3 deeper)
- Imidazole[4,5-c]pyridine ribonucleosides and ribonucleotides
- Indazole ribonucleosides and ribonucleotides
- Indole ribonucleosides and ribonucleotides
- Molybdopterin dinucleotides
- Nucleoside and nucleotide analogues (+52 deeper)
- Pteridine nucleosides and nucleotides
- Purine nucleosides (+3 deeper)
- Purine nucleotides (+36 deeper)
- Pyrano[3,2-d]pyrimidine glycosides
- Pyrazole ribonucleosides and ribonucleotides
- Pyrazolo[3,4-d]pyrimidine glycosides
- Pyrazolopyrimidine ribonucleosides and ribonucleotides
- Pyridine nucleosides
- Pyridine nucleotides (+2 deeper)
- Pyrimidine nucleosides (+3 deeper)
- Pyrimidine nucleotides (+35 deeper)
- Pyrrolopyrimidine nucleosides and nucleotides
- Ribonucleoside 3'-phosphates
- Thieno[2,3-d]pyrimidine glycosides
- Triazole ribonucleosides and ribonucleotides
- v-triazolo[4,5-d]pyrimidine glycosides

ChemOnt superclass: Organic 1,3-dipolar compounds

Chemical entities → Organic/Inorganic compounds → this superclass

35 sub-classes below in total · shown to depth 4 (branches marked '(+N deeper)' continue further)

● Organic 1,3-dipolar compounds

● Allyl-type 1,3-dipolar organic compounds

- Azo imides
- Azomethine imides
- Azomethine ylides
- Azoxy compounds
- Nitrones
- Organic nitro compounds
 - C-nitro compounds
 - Fluorodinitromethyl compounds
 - Nitroaromatic compounds
 - Nitramines
 - Nitrimines
 - Nitrite esters
- Oxonium ylides
 - Carbonyl imides
 - Carbonyl oxides
 - Carbonyl ylides

● Carbene-type 1,3-dipolar compounds

- Acyl carbenes
- Imido yl carbenes
- Vinyl carbenes

● Propargyl-type 1,3-dipolar organic compounds

- 3-cyanotriazenes
 - Aromatic 3-cyanotriazenes
- Arenediazo aryl sulfides
- Bis-arenediazo oxides
- Bis-arenediazo sulfides
- Diazo compounds
- Nitrile imides
- Nitrile oxides
- Nitrile ylides
- Organoazides
 - Alkenyl azides
 - Alkyl azides
 - Aryl azides

ChemOnt superclass: Organic Polymers

Chemical entities → Organic/Inorganic compounds → this superclass

ChemOnt superclass: Organic acids and derivatives

Chemical entities → Organic/Inorganic compounds → this superclass
422 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

- Organic acids and derivatives
 - Acetylenedicarboxylates
 - Arsonous acid esters
 - Borate esters
 - Borinic acid derivatives (+2 deeper)
 - Boronic acid derivatives (+2 deeper)
 - Carbodiselenoic acids
 - Carbodithioic acid esters
 - Carbodithioic acids
 - Carboperoxoic acids
 - Carboperoxoselenoic acids
 - Carboperoxothioic OO-acids
 - Carboselenoic acids and derivatives (+2 deeper)
 - Carboselenothioic S-acids
 - Carboselenothioic Se-acids
 - Carbotelluroic acids and derivatives (+1 deeper)
 - Carbothioic O-acids
 - Carbothioic O-esters
 - Carbothioic O-lactones
 - Carbothioic S-acids
 - Carbothioic S-esters
 - Carbothioic S-lactones
 - Carboximidic acids and derivatives (+5 deeper)
 - Carboxylic acids and derivatives (+150 deeper)
 - Dithiocarbamic acids and derivatives (+8 deeper)
 - Dithiosulfonic O-acids
 - Dithiosulfonic S-acids
 - Hydrazineselenoamides
 - Hydrazinesulfinic acids
 - Hydroxy acids and derivatives (+6 deeper)
 - Hydroxylamine O-sulfonic acids
 - Imidothioic acids and derivatives (+2 deeper)
 - Keto acids and derivatives (+6 deeper)
 - Nitronic acids
 - Organic carbonic acids and derivatives (+16 deeper)
 - Organic dithiophosphoric acids and derivatives (+5 deeper)
 - Organic nitric acids and derivatives (+2 deeper)
 - Organic phosphonic acids and derivatives (+8 deeper)
 - Organic phosphoric acids and derivatives (+23 deeper)
 - Organic sulfonic acids and derivatives (+22 deeper)
 - Organic sulfuric acids and derivatives (+10 deeper)
 - Organic thiophosphonic acid derivatives
 - Organic thiophosphoric acids and derivatives (+10 deeper)
 - Organic thiosulfinic acids
 - Organic thiosulfuric acids and derivatives (+1 deeper)
 - Organoarsinous acid esters
 - Organoarsinous acids
 - Organoarsonous acids
 - Organosulfenic acids and derivatives (+5 deeper)
 - Orthocarboxylic acid derivatives (+2 deeper)
 - Peptidomimetics (+35 deeper)
 - Perselenic acids and derivatives (+1 deeper)
 - Selenenic acids
 - Selenimidic acids
 - Seleninic acids and derivatives
 - Selenodiimidic acids
 - Sulfamic acid derivatives (+1 deeper)
 - Sulfinic acids and derivatives (+6 deeper)
 - Sulfinohydrazonic acids
 - Sulfinohydrazonoperoxoic acids
 - Sulfinohydroximic acids
 - Sulfinoimidoperoxoic acids
 - Sulfonimidic acids
 - Sulfonimidodithioic acids
 - Sulfonimidoselenoic acids
 - Sulfonodihydrazonic acids
 - Sulfonodiimidic acids
 - Sulfonodiimidoperoxoic acids
 - Sulfonohydrazonamides
 - Sulfonohydrazonic acids
 - Sulfonohydrazonimidic acids
 - Sulfonohydrazonothioic o-acids
 - Sulfonohydrazonothioic s-acids
 - Telluric acids and derivatives (+1 deeper)
 - Tellurinohydrazonic acids
 - Thiocarbamic acids
 - Thiocarboxylic acids and derivatives (+3 deeper)
 - Thiohydroximic acids and derivatives (+2 deeper)
 - Thiosulfinic acid esters
 - Thiosulfonimidic o-acids
 - Thiosulfonimidic s-acids
 - Trithiosulfonic acids
 - Vinylogous acids
 - Vinylogous amides
 - Vinylogous esters
 - Vinylogous thioesters

- Trithiolanes

ChemOnt superclass: Organometallic compounds

Chemical entities → Organic/Inorganic compounds → this superclass

148 sub-classes below in total · shown to depth 2 (branches marked '(+N deeper)' continue further)

● Organometallic compounds

ChemOnt superclass: Organophosphorus compounds

Chemical entities → Organic/Inorganic compounds → this superclass

22 sub-classes below in total · shown to depth 2 (branches marked '(+N deeper)' continue further)

● Organophosphorus compounds

- Alkylhalophosphines
- Alkylphosphonofluoridic acids and esters
- Dihydroxyphosphanes
- Diphosphenes
- Oligophosphenes
- Organic fluorophosphonic acids and derivatives
- Organic phosphines and derivatives
 - Organophosphine oxides
- Organophosphinic acids and derivatives
 - Phosphinic acid esters
- Organothiophosphorus compounds
 - Organophosphorotrithioic acids and derivatives
 - Phosphine sulfides
 - Phosphoramidothioic acid O-esters
 - Phosphoramidothioic acid S-esters
 - Phosphoramidothioic-acid-O,S-diester
- Phosphine imides
- Phosphorus mustard compounds
- Tetraalkylphosphonium compounds
- Tetraalkylphosphonium halides
- Trialkylphosphanes
- Trialkylphosphites

ChemOnt superclass: Organopnictogen compounds

Chemical entities → Organic/Inorganic compounds → this superclass

0 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

- **Organopnictogen compounds**

ChemOnt superclass: Organosulfur compounds

Chemical entities → Organic/Inorganic compounds → this superclass

101 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Organosulfur compounds

- Alkyl sulfur compounds
- Aminosulfonodithiaryl compounds
- Imidothioesters (+1 deeper)
- Isothiocyanates (+1 deeper)
- Isothioureas
- Organic disulfides (+2 deeper)
- Organic sulfonium compounds
- Organic thioperoxides
- Organic trisulfides
- S-aminosulfonimidothioyl compounds
- S-hydrazinosulfonimidoyl compounds
- Sulfenes
- Sulfenyl compounds (+1 deeper)
- Sulfimides
- Sulfines
- Sulfinyl compounds (+4 deeper)
- Sulfonediimides
- Sulfonimidamides
- Sulfonodiimidamides
- Sulfonothioic O-acids
- Sulfonyls (+13 deeper)
- Sulfoxides
- Thioacetals (+4 deeper)
- Thioamides (+2 deeper)
- Thiocarbonyl compounds (+25 deeper)
- Thiocyanates (+1 deeper)
- Thiodisulfates
- Thioenols
- Thioethers (+7 deeper)
- Thiohemiaminal derivatives (+1 deeper)
- Thiols (+2 deeper)
- Thioperoxols (+2 deeper)
- Thioselenides
- Thiosulfonic acids
- Thioureas

ChemOnt superclass: Phenylpropanoids and polyketides

Chemical entities → Organic/Inorganic compounds → this superclass

273 sub-classes below in total · shown to depth 1 (branches marked '(+N deeper)' continue further)

● Phenylpropanoids and polyketides

- 1,2-diaryl-2-propen-1-ols
- 2-arylbenzofuran flavonoids (+4 deeper)
- 3,4-dihydrocoumarins
- Alpha-methyldeoxybenzoin flavonoids
- Angucyclines
- Anthracyclines
- Aurone flavonoids (+1 deeper)
- Brevetoxins and derivatives
- Ciguatera toxins
- Cinnamaldehydes
- Cinnamic acids and derivatives (+19 deeper)
- Cinnamyl alcohols
- Coumarins and derivatives (+27 deeper)
- Depsides and depsidones
- Diarylheptanoids (+5 deeper)
- Flavonoids (+101 deeper)
- Homoisoflavonoids (+3 deeper)
- Isochromanequinones (+1 deeper)
- Isocoumarins and derivatives
- Isoflavonoids (+46 deeper)
- Kavalactones
- Linear 1,3-diarylpropanoids (+9 deeper)
- Macrolactams
- Macrolide lactams
- Macrolides and analogues (+4 deeper)
- Neoflavonoids (+9 deeper)
- Ochratoxins and related substances
- Okadaic acids and derivatives
- Phenylpropanoic acids
- Saxitoxins, gonyautoxins, and derivatives
- Sterigmatocystins
- Stilbenes (+3 deeper)
- Tannins (+7 deeper)
- Tetracyclines
